

Add a YouTube Video to an Assignment Submission or Post

Last Modified on 05/10/2022 10:33 am CDT

You can add a YouTube video anywhere you find the Insert Stuff button in a WYSIWYG/HTML editor.

1. Inside the WYSIWYG/HTML editor (wherever you are using it: News, Content, Dropbox Instructions, Discussion Prompt, etc.), click on the first button in the toolbar - **Insert Stuff**.
2. Click on the **YouTube** icon and search for a video relevant to your content.
3. If you find the video you want here, select it and click **Next**. Some videos are not allowed to be embedded. These videos will place a link instead.

If you cannot find the video in your search

1. If the YouTube search box does not find a video you already know exists on YouTube, go to the YouTube site and find the video and its embed code.
2. Click the **Insert Stuff** button then click **Enter Embed Code** to insert the video embed code you got from the YouTube website.

NOTE: You can find instructions on copying the embed code here: <https://support.google.com/youtube/answer/171780?hl=en>
