

Use Discover Tool

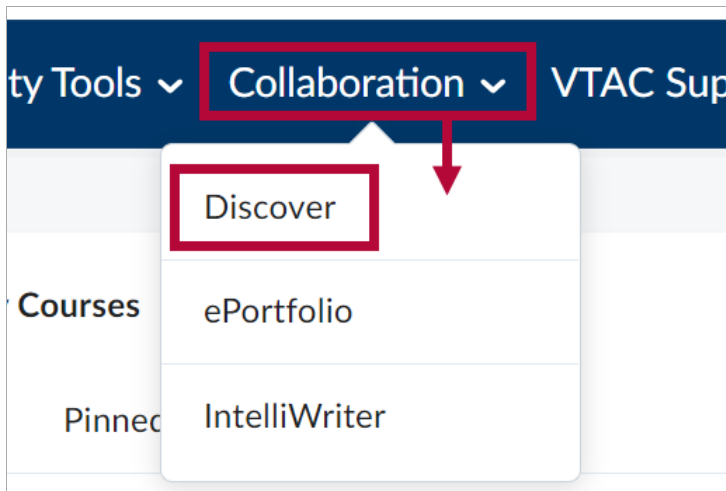

Last Modified on 04/01/2026 4:23 pm CDT

Discover is a tool which allows users to self-enroll in **Community Groups** in D2L. Students can freely enroll or unenroll themselves from most Community Groups in the Discover tool without needing to be added or approved by the Group Manager of the Community Group.

Use the Discover Tool to Enroll in Courses

1. From the **Navbar** on the **D2L Homepage**, select **[Collaboration]** followed by **[Discover]**.

NOTE: When attempting to access **Discover**, please make sure you are **NOT** within a course. You must be on the **D2L Homepage**, the same page where you can see your **Course List**.

2. A list of community groups available for self-enrollment will appear. Click on the community group you would like to enroll in. You can also use the **[Search]** bar if needed.

NOTE: Community Groups meant for students usually include the word **Student** in their name.
