

Record With YuJa Software Capture [Desktop]

Last Modified on 01/30/2025 4:50 pm CST

YuJa is the official video platform supported by Lone Star College and integrated into D2L.

[Windows Installation Video](#) [Apple Installation Video](#)

1. From your D2L Course, click **[Course Activities]** -> **[YuJa Video Platform]**.

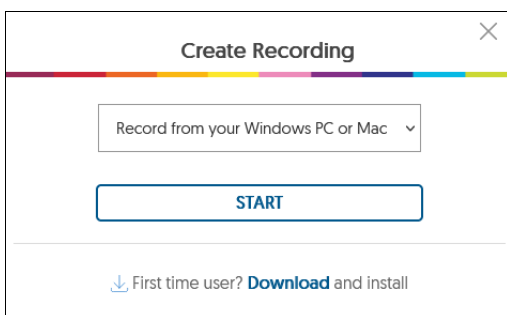

[Windows Capture Overview Video](#) [Apple Capture Overview Video](#)

2. From the YuJa homepage, Click on **Create Recording**.

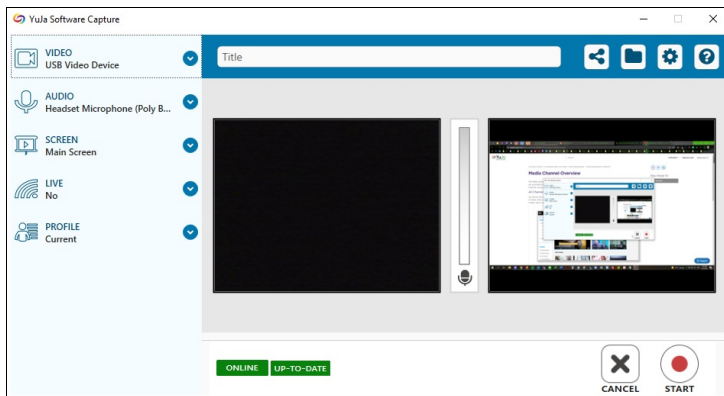

3. On the Create Recording window, use the drop-down menu to choose between **Record from your Windows PC or Mac**, or **Record with Browser Capture Studio**. Click **[Start]**.

NOTE: You will not be able to **Pause** during recording while using **YuJa Browser**

Capture Studio, you can only **Pause** when recording using **YuJa Software Capture**.

4. Select **Record from your Windows PC or Mac** to launch the **YuJa Software Capture** window.

5. Configure **Video**, **Audio**, **Screen** to preference from the left toolbar. By default, these settings will be set to **ON**.

- **Video** - Configure up to two video sources by clicking the drop-down menu.

Click on **Advance Settings** to adjust **capture resolution** and **frame rate**.

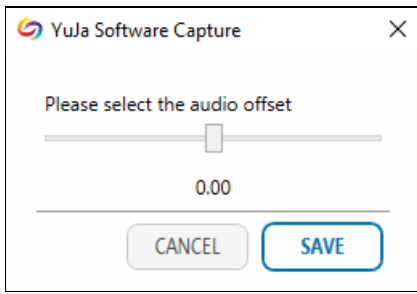

This determines video quality and file size. With great video quality comes great file size.

- **Audio** - Configure up to two microphone sources.

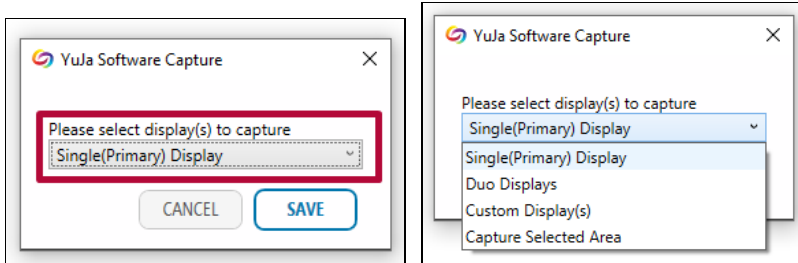

Click on **Advance Settings** to adjust audio offset if needed. Recommended to leave this at 0.00.

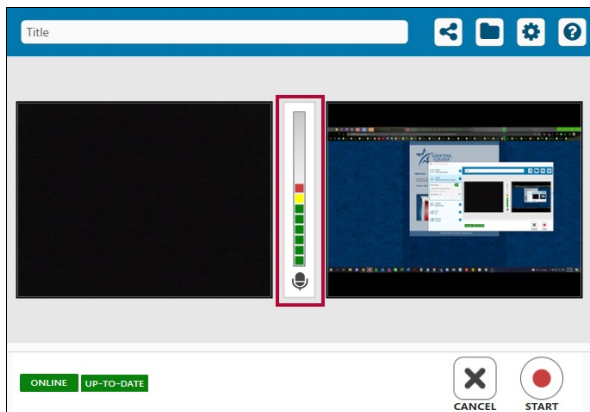

- **Screen** - Configure the source of where you want YuJa to record.

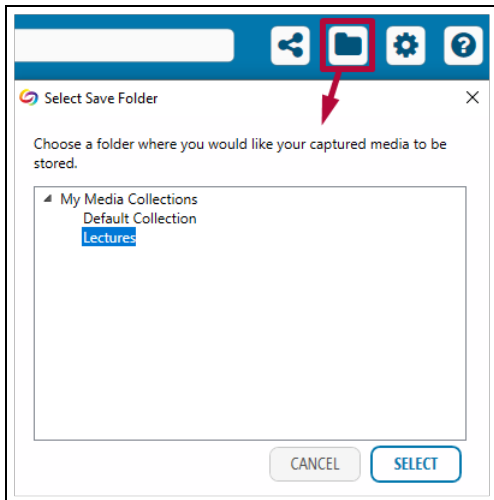

Click on **Advance Settings** to configure which display to capture, select **Capture Selected Area** to only capture a specific area of your screen.

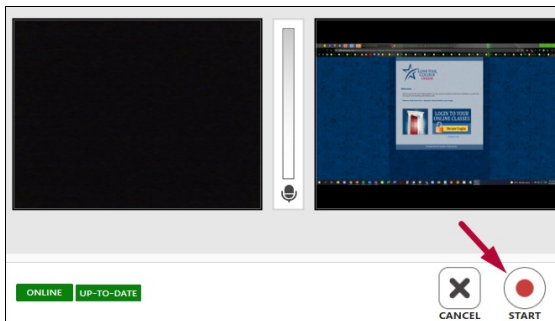

6. On the **YuJa Software Capture** window, verify that the microphone is recording your voice. Speak into your mic and see if colored blocks pop up in the center bar.

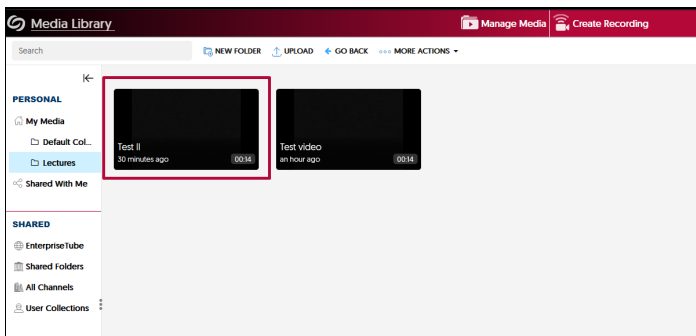

7. Select the **Folder** icon above to configure the location of your recordings within your **YuJa Media Library**. Please refer to [Manage Your YuJa Videos](https://vlac.lonestar.edu/help/manage-yuja-videos) (<https://vlac.lonestar.edu/help/manage-yuja-videos>) for tips on how to set up folders within your **YuJa Media Library**.

8. Hit **[Start]** to start recording.

9. When finished, your video will be saved within the specified folder at your **YuJa Media Library**.

NOTE: At any time, if your YuJa window is nowhere to be found, please check your task bar. You may need to click on **Show Hidden Icons** to reveal the YuJa icon. Double clicking the YuJa icon will bring back the **YuJa Software Capture** window.
