Record with YuJa Browser Capture Studio

Last Modified on 02/16/2024 3:32 pm CST

1. From your D2L Course, click **[Course Activities]** -> **[YuJa Video Platform]**.

   ▪

2. From the YuJa homepage, Click on **Create Recording** at the top of the page.

3. On the Create Recording window, use the drop-down menu to select **Record with Browser Capture Studio**.
   Title your video, then click **[Start]**.

4. You will see **Browser Capture Options** on the left side.

5. **Recording Options**: You can configure your recording options between **Camera**, **Screen**, or **Both**.
   This is the video layout of what your students will see.

   Make sure you choose the correct screen, window, or application for where you want to record from. Click on **Allow**.

6. **Audio**: Configure your **Microphone** here through the drop-down menu.
   Be sure to choose the correct audio input device for your device.

   Click on **Allow** on the prompt below.

   Verify that the audio bar below the video panel is detecting sound, you should see a fluctuating blue meter reacting to your voice.

7. **Video**: Configure your **Face Camera** here through the drop-down menu.
Be sure to choose the correct **Webcam** for your device.

Click on **Allow** on the prompt below.

---

8. After you have all your sources selected, click **[Start Recording]**.

---

9. When your recording is completed, click **[Stop]** located at the bottom.

---

10. When finished, you will see **[Download]**, **[Upload]**, and **[Discard]** below the panel.

[Download] will prompt you to save the file onto your device. The file will be saved in **Web Media Video (.webm)** format.

[Upload] will upload the video to your **YuJa Media Library**.
